

Picture Ore In Mines Of Willow Creek Dist.

Charles Eaton, the well known Atlanta mining man, was in the city this week having come from Willow Creek, the new Nye county gold district, where he has obtained a lease on the McMullen property, the scope of the original strike there.

Mr. Eaton is very enthusiastic over the new camp and believes it is going to prove to be a winner.

Cyrus McMullen and his two sons Frank and Ed., are busy sacking high grade ore, which, it is claimed will average close to \$500 to the ton in gold. Assays on picked samples have run as high as \$18,000.

George Wingfield's engineers, Mr. Eaton states, have purchased the rich silver property located about 1 1/2 miles from the McMullen property.

There are a number of Pioche men in the camp and some of them have located claims that are very advantageously situated. Willow Creek is about 25 miles from Sharp, the nearest post-office.

Mr. Eaton will leave today with supplies and experts, after visiting Atlanta a day or two, to depart for Willow Creek to stay indefinitely.

THOUSANDS OF STOCK CATTLE BROUGHT FROM CALIFORNIA

The drought in California is forcing the big cattlemen of that state to ship their herds to where the feed is better and Nevada is getting her share of the "starvation cattle." Robert Newman and Geo. Russell, Jr., were in Bismarck yesterday. Mr. Russell tells us that the big cattle firm of Miller & Lux have leased the Grayson ranch and are shipping their cattle from the dry state. Saturday, 2,400 head were unloaded at that place, and a few days ago 3,000 head were unloaded at Junco, to be raised on the Dunphy ranch, which has also been leased by this firm. They have also shipped 10,000 head of stock cattle to Kelton, from which place they will be driven to the range in Idaho, and in addition 22,000 head were recently unloaded at Junco, to be ranged near that place. —Elko Free Press.

DRY FARMING NEAR WELLS PROVES SUCCESS

W. Z. Connolly, who has a home about a short distance south of town, is demonstrating what can be done in the dry farming line when the proper methods are applied. He has seventeen acres of grain that cannot be bent anywhere in the country, whether on irrigated or non-irrigated soil.

In May, 1912, merely as a matter of experiment, Mr. Connolly planted the ground in rye, knowing that it would not mature, but believing that he might harvest a small crop of hay from the land. The ground was not fenced, however, and the tender young sprigs proved an attraction for the surrounding cattle, who kept the path of land bare of grain. All summer long the rye furnished some pasture for cattle, and in the fall Mr. Connolly intended re-planting the ground again and seedling it. However, he was advised by persons who had had some experience in such matters to allow the ground to remain just as it was. After the first showers had come the rye commenced again to grow and this spring as soon as the snow was off and the ground thawed out it was noted that the grain was growing splendidly.

Last Sunday the rye was fully waist high to the average man, the stand very heavy and the heads well formed, many of them being fully six inches high.

Mr. Connolly estimates that the

crop will be ripened and ready for the harvester between June 25th and July 1st, and it is certain that the yield will be very large.—Wells Herald.

NEW STATION CUT IN THE VIRGINIA-LOUISE

Work is being pushed ahead steadily at the Virginia-Louise mine. During the week energy has been directed toward putting in a 15-foot station at the 450-foot level. Within the next few days a cross-cut will be started off toward the rich fissure and on the upper level on which will be run drifts to tap the big manganese beds.

After getting this work under way, work in the shaft will be resumed to the water level, which will be found at about 500 feet depth.

OLD TIMER LEASE IS SHOWING UP WELL

Reports received during the week from the Old Timer property where Parker, Brown and Hosmer are working a lease, are of a very gratifying character. Some splendid ore has been opened up in this property and Mr. Parker and associates feel greatly encouraged over the outlook.

Prince Con. Shipments

The Prince Con. company is outfitting an average of 200 tons of ore daily from its mine. Meanwhile, the management is constantly developing and exploring new ore bodies.

Dickie's Bristol Lease

F. K. Dickie, one of the leasers of the Day-Bristol properties at Bristol, has received returns from his initial shipment. He has another car ready for market.

GOOD REPORTS COME FROM THE WILLOW CREEK REGION

Willow Creek, or rather the entire range from Camp's place at Heath's Canyon south to Willow Creek, it still the absorbing topic of mining circles. As usual many specimens are coming in from that section which are literally "lousy" with gold, which is an incentive to prospectors to get in and dig. Geo. Coffin, an old time Ellyte, is the latest prospector to have been smiled upon by the fickle goddess of fortune. He recently located three claims near Camp's original discovery east of the Blue Eagle ranch. He took one sack of ore from each of the claims. A sample was taken from each of the sacks, the assay result of which was better than \$400. It is said that many of the specimens show free gold. Mr. Coffin is more than seventy years of age, he has followed mining a long time and is entitled to something pretty good, and it looks like he has struck it at last.

Chambers & O'Hara, proprietors of the "Bud" in Ely, also have a number of good locations in that section. —Ely Record.

Time Asks Examination

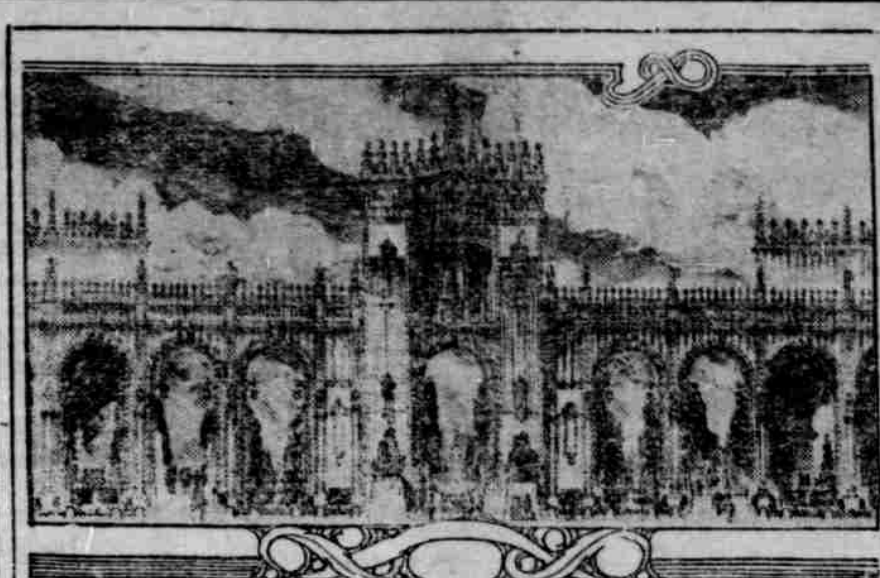

Trippe & Co., syndicate manager of the Consolidated Nevada-Utah corporation, has mailed the stockholders of the Nevada-Utah notice of a further extension of the time within which the old stockholders can deposit their certificates with Columbia Knickerbocker Trust Co., of New York or the New England Trust company of Boston. The books close on August 10, so that everyone will have a chance to secure stock in the new company after paying the assessment. Full particulars will be furnished on application to Trippe & Co., New York.

AR SHIPMENT FROM THE IRON MINE LEASE

J. A. Nesbitt, who is working a lease on the Iron mine at Bristol, has received returns from another car load of ore shipped early last week. Nesbitt is working four men and is getting out some nice ore.

Way to Wealth.

Having read how the richest men in the world made their money, it is easy for the rest of us to go and do likewise.—Sterling Standard.

Statement Issued To O.K. Stockholders

Local stockholders of the Ohio-Kentucky Con. Mining Co., are in receipt of the following communication from Trippe & Co., of New York:

"Under an agreement made with Mr. E. L. Godbe of Salt Lake City, dated March 10, 1913, we have acquired from Mr. Godbe 122,750 shares of the capital stock of the Ohio-Kentucky Consolidated Mining company, in consideration of our paying debts of the company amounting to approximately \$25,000, subject however, to a provision that the stock should be offered to the stockholders of the Ohio-Kentucky Consolidated Mining company pro rata in proportion to their respective holdings of the stock of the Ohio-Kentucky Consolidated Mining company. On the basis aforesaid the price which we paid for these shares amounts to nearly twenty cents a share.

"The public service commission has upheld the decision in the complaint filed by the city of Ely against the Ely Light and Power company sustaining the complaint of the municipality that the corporation's rates were too high. The commission last Saturday reduced the rates to \$1.50 and directed that other reductions be made.

NEVADA STATE NEWS

Shipped Car Of Ore

The Pioche assay office shipped a car of ore Thursday. The ore was purchased from the owners of small producers.

Buyers Morpa Townsite

Frederick Cobb of Los Angeles, who owned the quarter section of land upon which the town of Morpa now stands when the railroad was under construction, has sold his entire holdings to R. W. Bull of Los Angeles. The deal was consummated on the 16th inst.

Ely's Light and Power

The public service commission has upheld the decision in the complaint filed by the city of Ely against the Ely Light and Power company sustaining the complaint of the municipality that the corporation's rates were too high. The commission last Saturday reduced the rates to \$1.50 and directed that other reductions be made.

Back From Panama

Col. H. B. Maxon returned to Reno on Tuesday, his work on the Isthmus of Panama having been completed. With him he brought a negro servant boy from Jamaica, two rare monkeys, a couple of swearing parrots, a cage of paroquets and a few other feathered specimens.

May Reduce Machine License

Carpenter is preparing an ordinance reducing the license on nickel-in-the-slot machines from \$20 to \$12.50 per quarter.

Raced With The Flood

Train No. 10 on the Southern Pacific ran into a cloudburst west of Granite last Thursday night and had per quarter.

Winnemucca's New Postoffice

The furniture and equipment for Winnemucca's new postoffice building arrived Sunday night and the new headquarters for the mail will soon be doing business.

Bunkerville Couple Married

Newell Leavitt and Miss Neta Earl were married on the 1st inst in the Mormon temple at St. George, Utah. Mr. Leavitt is a member of a well known Bunkerville family and the bride is a daughter of Bishop Earl of Bunkerville.

Force Reduced At Carson

Yesterday at noon State Printer Farnsworth reduced the force in the state printing office to only two men. This became necessary as the work for the season has been completed.

Big Mill Planned For Atlanta Gold Mine

large force of printers have been employed for many months and have turned out a large amount of work in the very best manner. The work of the state printing office is such as to bring a vast amount of praise to the management and the competent help employed.—Carson News.

A CULTURE GULF RAPIDLY TO FRONT

Frank Eaton, a horse buyer of Battle Mountain, is spending a few days in this section, and brings a glowing report of the many improvements that are now being made in the country immediately around Battle Mountain.

The Keating Ranching company of Utah last fall purchased 14,500 acres of splendid agricultural land in the Humboldt valley within a few miles of Battle Mountain, and since that time has been expending much money and energy in improving its holdings. The company has demonstrated beyond question that practically any amount of artesian water can be had at depths ranging from 160 to 250 feet, and many wells are being sunk, which usually flow a 2 1/2 inch stream of solid water several feet above the surface of the ground. Tests for artesian water have extended for a distance of 20 miles along the valley and, practically in all instances an abundance of artesian water is had. At a depth of from ten to twelve feet an inexhaustible supply of surface water is obtained, which is pumped to the surface and used for irrigating purposes. Many surface wells are being dug and pumps installed by parties who lack the means at the present time to secure artesian flows. The Keating Ranching company has already expended about a quarter of a million dollars on its enterprise, and has been the means of bringing in many settlers who are now breaking up and cultivating the lands. The company seems to be very strong financially, bringing in its machinery, such as implements, ditchers, graders, engines, etc., in carload lots.

The Ellison Ranching company is another strong corporation which is also interested in reclaiming the valley around Battle Mountain. This company recently paid \$250,000 for the Nelson ranch, including about fourteen sections of choice agricultural land which it is now rapidly reclaiming, subdividing and selling to actual settlers, who are coming in from Utah in large numbers. At the present time it is said that about 50 new men have purchased holdings in the valley near Battle Mountain, who are breaking up hundreds of acres of land, establishing farms and building homes. Traction engines are largely used for breaking up land, while grain and potatoes are being planted.

One outfit, under the management of George A. Close, with 5000 acres, is trying dry farming on an extensive scale, having 100 acres in cultivation this year. Mr. Close has had much experience in dry farming, and considers the conditions around Battle Mountain as ideal.—Ely Record.

INJUNCTION AGAINST STATE ENGINEER KEARNEY

WINNEMUCCA, June 16.—State Engineer W. M. Kearney was enjoined Saturday by an order of the district court issued by Judge Ducker, from proceeding to determine water rights on the Humboldt river under the law enacted by the last legislature. The law was attacked in a bill filed by 55 ranchers along the river.

LOCAL NEWS ITEMS FROM THE TOWN OF CALIENTE

Special to the Record

CALIENTE, Nev., June 20.—Mr. and Mrs. C. T. Land and son have returned from a trip to California.

Mrs. Secy left for her home in Castledale Friday.

Nephil Higgins returned from Las Vegas last Thursday.

Miss Helen Osheay left for Salt Lake Sunday where she will remain a week or more.

J. J. Stubbenboard of the Atlanta Gold Mining company, was in town early in the week and reported everything going along smoothly at the mine where preparations are being made to enter upon a most vigorous development campaign.

It is understood that the Atlanta company has recently acquired valuable water power rights on Baker Creek, about 40 miles from Atlanta and that it is proposed to install an electric plant to convey power and light to Atlanta.

The Atlanta company has developed some immense bodies of low grade old ores which are commercially profitable when handled upon a big scale and this the company plans to do. It is proposed to erect a large milling plant and some idea of its size may be gleaned from the fact that it will be equipped to start off with a battery of 100 stamps.

Atlanta is the next big gold mining camp in Lincoln county.

Believes Hens Once Had Teeth.

That hens had teeth in the olden days is the opinion of Professor Gilbert of Los Angeles (Cal.) high school. In a recent address before a local organization of naturalists he also told his auditors that the eggs of birds have greatly decreased in size since their teeth became extinct. Had they been marketed then as they are now, he considered, they would, at the present scale of egg prices, bring from \$250 to \$1,000 each.

SCOTT GETTING HIGH GRADE FROM THE B & P

A. L. Scott, working the Boston & Pioche under a lease, continues to set out a good grade of shipping ore. He has recently received returns on a car of silver-lead ore sent to the Utah smelters.

Remembered.

Teacher—"Do you know, Tommy, when shingles first came into use?" Tommy—"I think when I was between five and six years old, ma'am."—New York Evening Post.

Mrs. E. Snow passed through Caliente Sunday on her way to Panaca where she will visit with relatives.

Sheriff D. J. Ronnow was a Caliente visitor during the week.

Miss Lena Wing left for Salt Lake Tuesday night and her friends say that she will be married soon.

Miss Florence English, who has been visiting with Caliente relatives returned home this week.

Miss Maggie Mathews of Panaca returned to Caliente Thursday on No. 1.

Mr. Cropper, who has been engaged as an operator of this point for sometime past has resigned and departed for their east last Monday.

Manager Geo. Senter of the Crow Bar has recently had his place of business improved by the application of a new coat of paper and paint.

The stork paid a visit Thursday to the home of H. Jackson on Denon Heights and left a fine baby girl. Mother and babe are doing well.

Senator W. A. Clark and party passed through Caliente a few days ago on his way east from Los Angeles.

A pleasant gathering, to bid farewell to Miss Mattie Lynch who has been stopping with her aunt, Mrs. Walter Reeder, was held at the Barton ranch on the 13th inst. A fine lunch with dancing and vocal music was had and everybody returned to town well pleased. Miss Lynch returned to her home at Las Vegas the following day.

Geo. Jeffs, of the Blue Front grocery, is visiting with relatives at Evanston, Wyo.
